

# Revitalize

**My Filler's** "New Life to the Skin" widens its application horizons and creates **My Filler "Revitalize"**, the special line of products for Mesotherapy procedures.

**My Filler Revitalize** is a state-of-the-art range and complete portfolio of sterile topical cosmetics for professional use.

## My FILLER Revitalize Body

Body and facial flaccidity is a direct consequence of aging and/or weight variations. To maintain a firm skin, without wrinkles, we must be very consistent with a healthy diet and a good hydration habits. **Revitalize Body** formula is composed of hyaluronic acid, organic compounds, DMAE and Dexpanpentol, which will reaffirm and restore the collagen fibres that support the skin, shaping them again, removing the skin sagging effect and flaccidity.

## Revitalize Body

### REVITALIZE PROTOCOL

1. Clean, sterilise and applied anaesthetic topical cream to the chosen area to be treated.
2. After 30-60 minutes check if the area is numb. Remove topical cream with gauze and warm water. Exfoliate the area with a double cleanse, sterilise area and blot dry. Protect patient using appropriate means of covering like gauze, micropore tape and head-band.

3. Select chosen mesotherapy product and draw down 1ml into sterile container - two products can be mixed together to form a cocktail ½ ml each.

4. Apply the product at area being treated with a cotton bud or gauze.
5. Choose depth on Revitalize Pen to maximum depth for the areas following (1mm face and 2-2.5mm body) and begin to stamp the mesotherapy product into the skin covering all areas.
6. Apply another layer of mesotherapy product.

7. Reduce Revitalize pen depth to half previous chosen. Create rows vertical and horizontal to cover all the areas.
8. Apply another layer of mesotherapy and repeat using 's' sweeping motions with the Reduce Revitalize to cover all areas.
9. Apply the remaining mesotherapy product liberally all over with cotton bud or gauze.

10. Blot the area dry with a tissue.
11. Apply moisturiser and/or SPF cream.
